POINT 05 i88 guarantees fairness in every game.
i88 develops quality games for players as well as acquires games from licensed top-notch game makers that are regularly reviewed by third-party institutions. In order to maintain the fairness of games, our security system adopts the latest safety technology. The RNG (random number generation function - game algorithm) used in software can never be manipulated by the management.

POINT 06 Game points are exchangeable with crypto-currency, Snowball token.
You will have a "wallet" that keeps and exchanges your game points for Snowball token. In other words, your game points are backed up by Snowball token which is very secure crypto-currency and expects price rise in the future.
